

FOX MOVE WEBSITES

An informed staff is a happy staff

Fox offers turnkey website templates that can be tailored to meet the unique needs of the client. The Move Website will offer a seamless way for the staff to stay informed, through convenient, well-understood web browser-based access from anywhere internal or external to the company. An informed staff makes for a much more effective and well-received transition to new space.

Your website, your tastes

The site will be managed and updated by Fox personnel. Fox will work closely with the client to determine what specific content is required and how that content should be presented to most reflect the brand, culture and creative desires of the client company.

Past clients, who concluded that “an informed staff” was a priority during their transition, have enhanced their Move Website content to provide incentive to their staff to log on and become acquainted with their move logistics. Examples include online surveys to vote on favorite furniture, humorous staff photographs with accompanying music, weekly move-related cartoons, message boards, video clips of the build-out or move process or even a client-hosted, regularly updated blog.

Sample Move Website Templates

The BASIC Package Includes:

- Client Branded Website
- Move News and Updates
- New Location Details
- Move Schedules
- From/To Lists
- Packing and Tagging Guidelines
- Frequently Asked Questions
- Facility and Progress Photos
- And more...

Quick, turnkey implementation

Fox's Move Website offering consists of an Initial Basic Package that may then be enhanced or customized as desired by the client. The turnkey website contains sections that apply to almost every move, including: Move News and Updates, New Location Details and Information, Move Schedules, From/To List, Move Guidelines, Move Coordination Details, Frequently Asked Questions, Move Progress Photo Galleries and Important Links. A sample BASIC package template website can be found at move1.foxrelocation.com.
